

**Certification Engineer - Job ID - 11465**

**Livonia, MI**

**Removal Date: August 5, 2016**

Roush supplies comprehensive, integrated development services and provides customers with support that fuses technology and engineering. From design through prototyping, testing and manufacturing, we take our customers' visions from the sketch pad to production. We're focused, efficient, and we deliver. With over 3000 employees in more than 40 facilities across the United States, and interests around the world, Roush solves customers' problems and provides significant support to the automotive, performance products, military, entertainment, alternative fuels and consumer products industries. We are focused on performance, driven by technology, and committed to our customers' success. If you're only happy when your customers are happy, we want you on our team.

Roush has an immediate need for a Certification Engineer for our Controls Engineering group. You will partner closely with members of the Vehicle Emissions Laboratory and the Calibration Engineering team in support of vehicle emissions certification (EPA and CARB). The Certification Engineer will be responsible for researching current vehicle and engine emissions regulations, processing of data, and the creation and submission of required engine emission and vehicle compliance applications to regulatory agencies for the emission certification of vehicles. This position is located in our Livonia, MI facility.

**Qualifications:**

- High School diploma or 2-year degree in engineering technology.
- Minimum two years' experience in the automotive field with experience with powertrain technology/testing.
- Basic familiarity with test data and engineering specification units and terminology.
- Desire to learn and the ability to absorb new technical assignments on your own.
- Proficient in Microsoft Word, Excel, PowerPoint and Project.
- Excellent verbal, written, attention to detail, and interpersonal skills, including the ability to write concise technical reports.
- Initiative to work independently and handle several assignments simultaneously.
- Able to manage time to ensure projects are completed by deadline.

**Preferred Skills**

Bachelor's degree in a technical area.

- Emissions testing, OBD2 calibration, or Powertrain calibration experience.
- Prior experience with Verify, DMS and CARB e-cert systems desirable.
- Database management and/or database programming.
- EPA and/or CARB certification experience.
- Knowledge of government regulations and/or the Code of Federal Regulations (CFR).
